

## Art is Energy

Our vision is simple: to put green energy technology - and the related jobs and economic benefits - into the hands of communities.

## Experience

Our founders have 20 years of experience in Renewable Energy Development and Sustainability Communications

### Vancouver Int'l Airport

Hybrid solar 2003 = Saving \$110,000/year

### Seton Lake

2 solar thermal installations including the first solar panel art mural of its kind.

### Neighborhood Link Homes

Toronto: Solar hot water system installed. 61,000 kWh produced since 2008

### Remote Communities

Multiple renewable energy systems designed for 75%+ diesel replacement (Solar, Micro-hydro, Biomas, Wind)

We have experience building engagement strategies for local and provincial and First Nation governments regarding sustainability and clean energy.

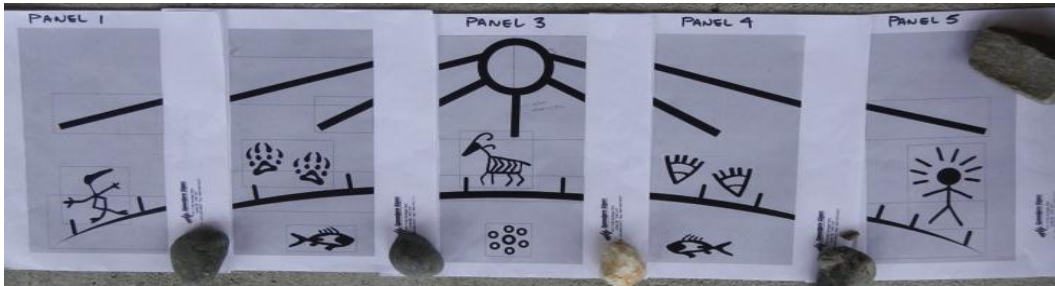

*"First Power is blending business innovation and social purpose through putting green energy technology and the benefits that come with it into the hands of communities."*

-Jennifer Neutel,  
Axiom News

## Clean Energy for Municipal Governments

First Power works in the spaces between clean energy, community engagement, art and culture. Globally, clean energy is more beautiful to the public when the community owns the project; we have many ways to engage communities and insure ownership. Through innovative finance, training, integrated system design we have started to shift the landscape of clean energy projects in

Canada. We are best known for our work with artists, architects and the cultural community on energy projects that stand as works of art (solar panels turned into solar murals). Our projects harness the technical skills of engineers, the social innovations of planners, cutting edge communications and the artistry of some of Canada's best known and up and coming artists.

## Opportunities

### Clean-Tech

Conduct an integrated energy design process geared to find and maximize energy savings while identifying opportunities to reduce operational carbon emissions.

### Community Art

Provide an exciting opportunity for the community to create art that transforms energy into engagement. Elected officials, staff, and community come together to build the legacy story that is expressed artistically on the project for generations to come.

## B-Corporation

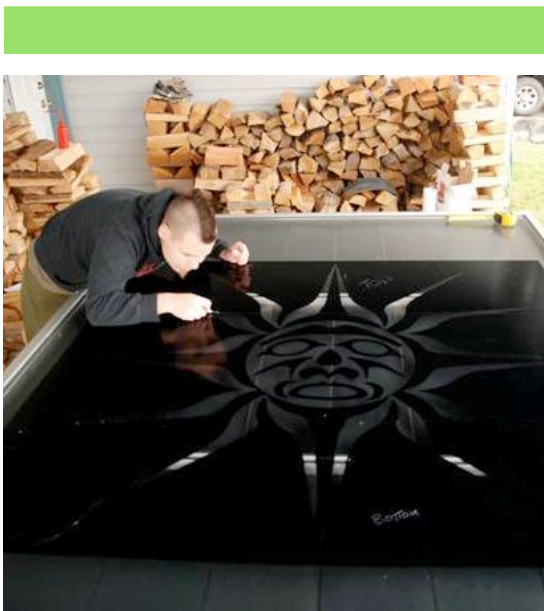

This sector is comprised of a new type of corporation – the B Corporation – Which is purpose-driven and creates benefit for all stakeholders, not just shareholders.

For more information:

We hold these truths to be self-evident:

- That we must be the change we seek in the world.
- That all business ought to be conducted as if people and place mattered.
- That, through their products, practices, and profits, businesses should aspire to do no harm and benefit all.
- To do so requires that we act with the understanding that we are each dependent upon another and thus responsible for each other and future generations.

Please contact us to discuss your project ideas, we love doing original projects and our team has worked with local governments for many years, we would love to help you achieve your goals and inspire your communities to further action.
